

This is short UX analysis for better UX for website redesign. I was assigned to do UX analysis for the redesign purpose.

Project Name: Myanmar Noble University

Plan: Redesign Website

It is obvious, the website used template design. But current website does not really provide good user experiences.

- Firstly, Homepage. I see three logos at the top. Most users will notice the name of university. It is easy to notice since it is in the left corner with the bigger text. But for me, as a user, seeing three university logos at the top is not okay. Making two logos small, put beside the main university logo can be good solution. It makes sense “ this big logo university is in partnership with these two small logos universities”.
- Ask Questions Button is also an issue. The placement, the color and UX writing need to be fixed.
- Student|Alumni|Faculty|Partner should be aligned together with search box.
- Having many tabs is good since the university has a lot of information to offer. But Font Color and type face are not right.
- Website is using video as background for intuitive and user friendly purpose. But having black border around video is not suitable.

ALUMINI

CONNECT WITH US

- This is about page. Basically too many texts and picture.
- Instead of writing a lot of texts which can make people bored. Adding pictures with slide animation will be better.

- This is Academics page. The same layout with about page.

- This is campus life page. The same as other pages.

People can be lost while surfing the website. Visitors will be students (age 16-20) and parents mostly.

- Will students be patient and get exact information in short time?
- Will parents be satisfied using the current website and have good user experience?
